A comprehensive reference of my development projects

🌐 Web Applications

RouteForce Pro

React

Node.js

MS SQL

Multi-tenant distribution platform with database-per-tenant architecture. Complete ERP-lite suite covering Order-to-Cash, inventory management, sales, logistics, and promotion engines for distributors.

Key Features: Multi-Tenancy, Order Management, Inventory Control, Logistics, Promotions Engine

USBT Pro (Stack)

Next.js 14

NestJS

GraphQL

High-scale sports tournament platform handling 10,000+ concurrent users during national tournament registrations. Cloud-native solution with real-time score updates for 50+ sports disciplines.

Key Pages: Admin Dashboard, Tournament Management, Enrollment Forms, Registration Flow, Real-time Score Updates

KUGarden

React.js

Social commerce order management system integrating orders from Facebook, TikTok, and Vrish with delivery tracking and QR code slip verification.

Kanoks.me

Next.js

Personal portfolio website showcasing development projects, skills, and professional experience. Live at kanoks.me

Lotto

Next.js

Lottery ordering platform for consumers with government API integration for processing and verifying lottery bills.

LuckyNumberMagic

React.js

Lucky number generator application with interactive UI for generating and displaying lucky numbers.

SmartSales

C# jQuery

Comprehensive inventory and sales management system. Features include dashboard analytics, inventory tracking, stock management, depositories control, and geographical reporting.

Key Features: Dashboard, Stock In/Out, Depositories, Map Reports, Analytics

NurseShip

Next.js 15 Prisma MySQL

Healthcare workforce management platform for hospitals. Features include shift scheduling, peer-to-peer shift swapping with head nurse approval workflows, booking management, notifications, and comprehensive admin controls for hospital, department, and user management.

Key Features: Dashboard, Shift Calendar, My Bookings, Shift Swaps, Notifications, Head Nurse Team Dashboard, Admin Controls (Hospital/Department/User Management), Shift Management

SmartESM Backoffice

React 18 Redux Redis

Field operations management dashboard with real-time visibility into thousands of simultaneous field sales activities. High-performance system with Redis caching and dynamic route planning.

Key Features: Real-time Dashboard, Route Planning, Activity Tracking, Performance Analytics

TravelExpense Pro

Next.js 14 Express.js SAP Integration

Corporate expense management system with multi-level approval workflow and automated SAP financial system integration. Reduced reimbursement turnaround time from weeks to days.

Key Features: Multi-Level Approval, SAP Integration, Expense Tracking, Automated Posting

VeriSmart Pro

Next.js Prisma ORM

Multi-tenant warranty and maintenance tracking system for distributors. Automated warranty expiration alerts and service ticket workflows with strict data isolation.

Key Features: Warranty Tracking, Service Tickets, Multi-Tenant, Automated Alerts

SmartRedeem Pro

Next.js MySQL MSSQL

B2B loyalty platform with dual-database architecture syncing MSSQL (ERP) to calculate points and manage redemptions. Automated point calculation for thousands of invoices.

Key Features: Points Calculation, Redemption Management, Dual-Database Sync, ERP Integration

ODMS Pro

.NET Core

SQL Server

EDI and order management system integrating orders from 8 major retailers using different formats (CSV, XML, Text). Centralized parsing engine with 90% reduction in processing time.

Key Features: EDI Parsing, Multi-Format Support, Order Management, Automated Processing

LogiFlow Pro

React 18

Redux Toolkit

PostgreSQL

E-commerce logistics platform with warehouse management, pick-pack-ship workflows, barcode scanning integration, and real-time analytics dashboard for multi-channel inventory tracking.

Key Features: Warehouse Management, Barcode Scanning, Real-time Analytics, Multi-Channel Inventory

Sport-Games

Next.js

Sports competition management platform with tournament organization, team management, and event registration capabilities. Includes admin controls for player printing and tournament oversight.

Key Pages: Login, Event Registration, Admin Tournament, Team Management, Player Printing

Stock Portfolio Manager

React.js

Comprehensive stock trading portfolio tracker with advanced features for managing investments, analyzing performance, and portfolio rebalancing. Includes DCA (Dollar Cost Averaging) calculator and logging.

Key Features: Dashboard, Portfolio Management, Holdings Tracking, Performance Analytics, DCA Calculator, Rebalancing Tools

ContentAI Pro

Next.js 15

tRPC

Stripe

AI-powered SaaS content generation platform offering 130+ AI tools with credit-based consumption and Stripe subscriptions. Production-ready platform with secure payment processing.

Key Features: 130+ AI Tools, Dashboard, Credits System, Stripe Payments, Usage History

HelpDesk AI

Next.js 15

LangChain

GPT-4

Agentic customer support automation using multi-agent system with LangGraph. Features 7 specialized agents and RAG with FAISS vector search for autonomous ticket resolution.

Key Features: Multi-Agent System, RAG, Knowledge Base, Autonomous Resolution, Intelligent Escalation

BeverageVision AI

Python

PyTorch

YOLO v5/v11

Computer vision inventory tracking using custom object detection to identify and count 19+ distinct beverage SKUs from mobile camera feeds. Reduced audit time by ~70%.

Key Features: Object Detection, SKU Recognition, Mobile Integration, Real-time Counting

GoldMind AI

GPT-4

Claude 3.5

Gemini Pro

Multi-model trading intelligence platform with ensemble AI architecture cross-validating signals from GPT-4, Claude 3.5, and Gemini Pro with consensus engine.

Key Features: Multi-Model Consensus, Trading Signals, Ensemble Architecture, Bias Reduction

n8n Automation Workflows

n8n

AI

AI-powered automation workflows built with n8n. Includes intelligent chat bot integration and automated market analysis workflows for business process automation.

Key Workflows: AI Chat Bot, AI Market Automation

📱 Mobile Applications

eOrder-Mobile

Mobile App

Mobile ordering application for seamless commerce experience. Features include product browsing, shopping cart, order completion, and order history tracking.

Key Screens: Splash, Login, Home, Product Information, Cart, Completed, Order History, More

SmartESM Mobile

React Native

SQLite

Offline-first field operations mobile app for capturing shelf-share and pricing data in remote areas. Features request queuing and automatic sync when connected.

Key Screens: Dashboard, Schedule, Customer Details, Activities, Price Check, Navigation Map, Questionnaire

PJP Mobile

React Native 0.79

TypeScript

MobX

Field performance and coaching app for sales supervisors. Track Work-With coaching sessions and KPIs using MobX State Tree for complex state and MMKV for high-performance storage.

Key Features: Coaching Sessions, KPI Tracking, Performance Metrics, Real-time Targets

FieldForce Pro

React Native

Realm DB

Offline sales force automation for remote areas. Place orders without internet using Realm Database with complex pricing logic and bi-directional sync.

Key Features: Offline Orders, Pricing Engine, Realm Sync, Route Planning

💰 FinTech & Trading Platforms

QuantForge AI

Python

Scikit-learn

XGBoost

Algorithmic trading platform with ML pipeline using Ensemble Learning (Random Forest, XGBoost) achieving 96% test accuracy. Democratized hedge-fund style trading tools.

Key Features: Backtesting, ML Predictions, Strategy Optimization, High-Frequency Data

GoldTrader Elite

Node.js

MetaTrader 5

MQL5

Automated trading system with Node.js analysis engine bridge to MT5. Executes trades via Expert Advisors with RSI/MACD indicators and strict risk management protocols.

Key Features: 24/7 Automation, Technical Analysis, Risk Management, MT5 Integration

DCAPort Pro

React

PostgreSQL

Finnhub API

Investment portfolio manager tracking Dollar Cost Averaging (DCA) performance with real-time market data. Institutional-grade portfolio analytics with realized/unrealized gains.

Key Features: DCA Tracking, Live Pricing, P&L Analytics, Portfolio Dashboard

⚙️ Specialized Tools

NotifyHub Pro

Node.js

Firebase FCM

LINE API

Multi-channel notification engine managing LINE and Mobile Push channels for enterprise alerts. Centralized system with scheduled cron jobs.

Key Features: LINE Integration, Push Notifications, Cron Scheduling, Multi-Channel

NEO Services

React 19

MS SQL Server

Database health monitoring SaaS proactively alerting admins of SQL Server anomalies (invoice gaps, duplicate prices) via LINE notifications.

Key Features: Anomaly Detection, Proactive Alerts, LINE Integration, SQL Server Monitoring

MongkolPlate

React 19

Vite

Framer Motion

Thai license plate numerology analysis platform with highly interactive UI and complex calculation logic. Smooth animations using Framer Motion.

Key Features: Numerology Calculations, Interactive UI, Smooth Animations, Thai Language

ThaiDine Finder

Next.js

Google Maps API

Places API

Location-based restaurant discovery platform using intelligent grid-based search algorithms to scan entire provinces.

Province-wide discovery with smart grid search.

Key Features: Grid-Based Search, Province Scanning, Google Maps Integration, Restaurant Discovery
