Focus areas include multi-tenant SaaS, offline-first mobile execution, AI product integration, data-heavy workflows, and high-trust product presentation.

DELIVERY LENS

What This Portfolio Signals

Built for quick executive review: product range, technical depth, system patterns, and the sectors most relevant to employers or clients.

- Full-stack ownership across frontend, backend, data, and integrations.
- Comfortable with business-critical systems, not just demo applications.
- Strong mix of product delivery, architecture thinking, and UI presentation quality.
- Track record across operations-heavy, trust-sensitive, and AI-enabled products.

Enterprise

Multi-tenant platforms, approvals, ERP sync, logistics, dashboards.

PORTFOLIO MAP

Domain Coverage

Enterprise SaaS & Cloud

10+

Operational systems, backoffice workflows, ERP-connected products, and multi-tenant delivery.

RouteForce Pro USBT Pro

SmartSales NurseShip

SmartESM TravelExpense

VeriSmart SmartRedeem

ODMS LogiFlow

AI & Machine Learning

4+

Content generation, multi-agent support automation, computer vision, and multi-model intelligence.

Specialized Tools & Consumer Apps

4+

Utility products and niche consumer applications where focused UX, clear product logic, and integration work matter most.

NotifyHub Pro

NEO Services

MongkolPlate

ThaiDine Finder

Multi-tenant

Database isolation, role-based access, scalable SaaS patterns.

Realtime

Subscription websocket delivery, notifications live sync.

Offline first

Queued sync, local storage, resilient mobile workflows.

High-trust UX

Executive dashboards, enterprise portals, print-ready presentation.

- Strong fit for platforms where business rules, integration depth, and delivery polish all matter.
- Works across architecture, implementation, and product-facing interface refinement.
- Comfortable translating complex operational needs into shippable systems.
